

BAYLISS RANCH

ALLPLANT ESSENCE™

ALLPLANT ELIXIR™

Certified Organic Botanical Extracts

The universal powers of plants are man's reward
for preserving the purity of Mother Nature.

Bayliss Ranch was founded by five brothers in 1865 in the Northern California Central Valley. In the 1900's, Donna Bayliss began to produce, distill and sell certified organic botanicals to manufacturers of personal care and cosmetic products as well as to food and beverage companies and aromatherapy practitioners. Today, we distill organic botanicals using a newly developed extraction process to produce certified organic ALLPLANT ESSENCE™ that replicates the entire plant. A patent that covers both the new process and new product is currently pending.

What is "organic"? "Organic" products are grown and processed in accordance with the U.S. Department of Agriculture's National Organic Program and the California Organic Products Act of 2003 (COPA).

Why go "organic"? We are helping create a whole new type of personal care line - one based on agricultural rather than synthetic ingredients. These types of products support farmers and a healthier earth.

What is ALLPLANT ESSENCE™? A water soluble plant extract. The aromatic constituents of the plants, captured in steam, result in a chemical composition 100% match to nature. *Finished products may be promoted as containing the whole plant essence in a bottle.*

Applications? ALLPLANT ESSENCE™ is a milder alternative to essential oils and the perfect base ingredient in formulating products allowing a certified organic labeling claim.

ALLPLANT ESSENCE™ may be used in: Hair Care Products ~ Mouth Washes ~ Skin Products ~ Bath Products

ALLPLANT ELIXIR™ may be used in: Beverages ~ Spritzes ~ Sauces

Quality Control: Every batch of Bayliss Ranch ALLPLANT ESSENCE™ is tested to assure that it meets our stringent quality requirements. ALLPLANT ESSENCE™ is stable when stored below 65 degrees F. and kept sealed.

Bayliss Ranch produces certified organic botanical products for use in personal care products, food, and beverages. Consumers expect personal care label claims to reflect the same integrity that organic food labels do:

"100% Organic"

"Organic"

"Made with Organic"

What do the different labels mean? Subtract any water or salt in your formula and look at what's left. If at least 70% of the remainder consists of certified organic ingredients, the label can say "made with organic" ingredients. If 95% or more of the ingredients in the product are certified organic, it may be labeled "organic." If all the ingredients are certified organic the product may be labeled "100% organic." All labels are subject to applicable State and Federal regulations.

REGISTRATION GUIDELINES: COPA, which became effective January 1, 2003, requires manufacturers of organic cosmetic products produced and/or sold in California to be registered as an organic producer of organic labeled cosmetic products with the Secretary of California Department of Food & Agriculture through the California Department of Health Services. Registration information and application forms are available from Department of Health Services.

Who must be registered?

- Any California facility manufacturing a personal care product labeled as "100% Organic," "Organic," or "Made with Organic Ingredients."
- Any ingredient distributor, broker and handler who purchases and resells an organic ingredient. The definition of handler includes bottler, distributor, importer, manufacturer, packer, processor, etc.
- Manufacturers of personal care products containing less than 70% organic ingredients identified on the ingredient panel.

ALLPLANT ESSENCE™

Bayliss Ranch is certified organic by California Certified Organic Farmers under the USDA - National Organic Program. This certificate verifies our commitment to the environment and to restore and protect our lands. We increase soil fertility through naturally derived composting and other methods. Our diverse planting of herbs and other crops provides a rich habitat for wildlife.
