Rage Against the War Machine in Washington

A vocal OCA contingent will be joining thousands of others on Sunday Feb. 19 at 12:30 pm in Washington, D.C. to march from the Lincoln Memorial to the White House under the banner of “Not one more penny for the War in Ukraine.” The March is sponsored by a new coalition, The Movement for a People’s Party (an offshoot of the Bernie Sanders campaign) and the Libertarian Party (the nation’s third largest political party, among others previously associated with former Congressman and anti-war libertarian Ron Paul).

As John Walsh reports for Global Research, the march is “in fact what much of the press would term a ‘right-left’ Coalition, spanning a spectrum broad enough to actually bring the proxy war in Ukraine to an end.

Dr. Michelle Perro: Biotech Babies

Dr. Michelle Perro, long-time OCA ally and co-founder of Regeneration Health International, writes: “Infertility, surrogacy, changing family structures, low milk production, inhospitable and toxic environments, stress, and a myriad of other factors are impacting breastfeeding babies. From the perspective of the baby biota, moms are the microbial stewardesses, passing on the collection of microorganisms that will direct much of the baby’s biology, and in particular, their immunological future. Vaginal births and breastfeeding ensure the inheritance of moms’ microbial wisdom to be passed onto the infant.

With the changing landscape of parents and pregnancies, many babies are not receiving the best source of infant nutrition, especially with a lens on the microbiota, whether from the acquisition of microorganisms from a vaginal birth and/or nursing.”

The Book on Toxic Chemicals & Cancer Prevention that Biden Needs to Read

Carey Gillam, renowned investigative reporter on Monsanto and the Poison Cartel, writes: “In President Biden’s state of the union address Tuesday night... he spoke of a reignited “Cancer Moonshot” search for a cure for cancers that are impacting far too many lives, and of measures to cut healthcare costs to make treating cancer more affordable. He outlined an ambitious goal to cut cancer death rates by at least 50% in the next 25 years, and to ‘turn more cancers from death sentences to treatable diseases, provide more support for patients and their families.’

But nowhere in his lengthy prime-time address did Biden speak of working to rein in the vast, virtually unchecked, flood of environmental chemical contaminants that scientists say cause cancer.”

Renewal, Resistance, & Regeneration

The U.S. and the entire world, even as the pandemic winds down, appear to be lurching toward endless conflict, chaos, fear-mongering, and engineered (accidentally or deliberately released) pandemics. The U.S./NATO proxy war in Ukraine. Sabre rattling and the threat of war with China. The Unholy Alliance of the Pentagon, CIA, the FBI, Silicon Valley, the corporate mass media, and Big Pharma to crush dissent and cover up reckless crimes such as the U.S. destruction of the Nord Stream 2 pipeline. The massive deaths and injuries from the lockdowns and the rushed-to-market experimental “vaccines.” The ongoing madness of “gain-of function” research (which Pfizer now euphemistically calls “directed evolution”), weaponizing viruses and pathogens, under the guise of “dual use” medical/military experimentation, part of the ongoing international biological arms race.

Sign the petition to ban “gain-of-function” experiments: https://orgcns.org/swp

Distract, Divide, & Conquer

John and Nisha Whitehead write: “The government is attempting to weaponize mental health care. Increasingly, in communities across the nation, police are being empowered to forcibly detain individuals they believe might be mentally ill, even if they pose no danger to others.

World governments, including the U.S., continue to use national crises such as COVID-19 to expand their emergency powers. None are willing to relinquish these powers when the crisis passes...”

Government by Panic-Mongering

Investigative reporter Matt Taibbi reports on the recent Chinese Weather Balloon incident and how panic-mongering is the new norm: “We may never know if it was spying, but the Chinese balloon served its purpose, feeding our political establishment’s tireless efforts to keep the public freaked out... What emergency? Doesn’t matter. Russian interference in the 2020 Presidential election] was a good startup disaster, but you can keep changing them. The important thing is the pattern. One, declare a crisis. Two, spread panic. Three, take emergency measures. If you do this over and over, you end up with permanent crisis, permanent panic, permanent emergency rule. So long as new crises keep evoking unconscious fear and anxiety, the legitimacy of the political establishment is continuously justified.”
